## SMILEY WATER GARDENS

Dear Friends:

It is a pleasure to send to you this new catalog of our Water Gardens. I am sure that in these days of uncertainty, more and more of you will realize that having a garden adds joy to life. A garden with a pool is unsurpassed for beauty and real home enjoyment.

We are trying to do our share in helping with this defense problem by making this catalog as simple as possible and still give to our customers adequate information as to our strong, vigorous, hardy Water Lily bulbs and other water plants. These are grown right here at our Gardens, under the most natural and ideal climatic conditions. After going over our lists and prices you will see that being centrally located in the United States, we can make prompt deliveries to any part of the country, and that we have the lowest prices for healthy, hardy bulbs, plants, fish and snails. We grow only the best varieties, suitable for water gardens in most sections, and for every climatic condition.

ONLY STRONG, VIGOROUS PLANTS are shipped. We positively **guarantee** that all plants are true to name, and are in good condition when shipped.

BY MAY AND EARLY JUNE our facilities are taxed to the utmost. Your orders always receive our most careful attention, but if we have an early order from you, it will be sent out to you without delay.

SMILEY'S WATER GARDENS are located at Beaver Crossing, 18 miles southwest of Seward, Nebraska.

*Mrs. Erle Smiley*

Smiley Water Gardens,  
Seward, Nebraska.

## HELPFUL SUGGESTIONS for SUCCESSFUL Water Gardens

**ESTABLISHING THE WATER GARDEN FERTILIZERS**—Garden loam gives good results. Best fertilizers are cow manure well rotted and bone meal. Cow manure at the rate of one part to five parts garden loam. Commercial fertilizers, one pound to each cubic foot of soil.

**TIME OF PLANTING**—Hardy water lilies may be planted as soon as they begin to show growth in the spring, usually April first, and they may be planted up to the last of August.

**DURATION OF BLOOM**—Hardy water lilies begin blooming early in May in this section of the country and continue until frost. Each individual blossom lasts about four days.

**COLOR**—Hardy water lilies may be obtained in many colors and tints.

### HOW TO PLANT

Plant in boxes or by spreading the soil over the bottom of the pool to the required depth. Plants do better when they have

plenty of root room. Each lily should have at least one cubic foot of soil.

**DISTANCE APART TO PLANT**—A pool six by six will accommodate four lilies and the necessary floating and bog plants very nicely.

**CONTAINERS FOR THE PLANTS**—We like large size candy pails for a single lily. If not available, boxes made from any rough boards one inch thick and twelve inches wide. Permanent boxes may be built of brick or concrete but movable boxes are preferred as they may be placed in the basement during the winter.

**SAND TO COVER THE BOXES**—One inch layer of sand or gravel over the boxes after planting will help to keep the water clear.

**INSECT ENEMIES**—Plant lice or aphids are the only common pests of water lilies. They are easily controlled by washing off with a strong spray from the hose and the fish eat them. "Black Leaf 40" mixed according to directions rids plants of this louse.

# Hardy Water Lilies

In establishing our water gardens we spared no time, effort, or money in securing not only the best varieties but those that would be most suitable for water gardens in most sections of the country. In this list you will find varieties that are suitable for every climatic condition, also for the various tastes in color and most any size pocketbook.

## RED and CRIMSON

Gloriosa—Semi-double. Most popular. Brilliant Red.....	\$1.75
Conqueror—One of the Showiest Reds. Cherry Red.....	1.65
James Brydon—Cup-shaped Rosy-Crimson. Free in bloom.....	1.85

\$4.85 Express  
Collect

Only  
**\$4.85**

All Tropical Water Lilies are shipped Express Collect. Add 50c per lily for parcel post shipment.

## How To Plant Tropical Lilies

Plant Tropical Water Lilies only after minimum temperature of 70 degrees can be depended upon. Earlier planting leads only to disappointment.

When planting Tropicals in a pool with other lilies and plants, boxes should be used in which to plant the bulbs. For each bulb a box 18x18 inches by 10 inches deep is a good size. Place four inches of fertilizer on the bottom, then five inches of soil and one inch of sand. Then plant the bulbs, covering them well so that only the top of the crown where the leaves and buds are attached is just showing. A few rocks placed very close to the crown will help keep the bulbs in place, to get the root system started. Place the bulbs at a slight angle, so that they will have plenty of room for growth forward.

Tropical Water Lilies may be wintered in a greenhouse pool, where they will bloom all winter. If you do not have this convenience, it is best to replace them each spring. Planting new vigorous bulbs each year, you will be more than repaid with large and colorful blossoms that will be prize winners for you.

## TROPICAL WATER LILIES

Tropical Lilies are not shipped until the first of June, except to latitudes south of Kansas. North of Kansas, be sure a warm temperature can be depended upon, and the nights are not too cool. They need warmth.

### DAY FLOWERING

#### WHITE:

Mrs. Geo. H. Pring—Pure white, large fragrant flowers..... \$1.50

#### PINK:

Mrs. C. W. Ward—Free blooming, rich rose pink..... 2.00

Independence—Dark pink coloring..... 1.75

# To Make Your Pool Complete Order SMILEY'S Shallow Water Plants . . .

Water plants will grow in two to twelve inches of water. They add greatly to the attraction of any pool, besides furnishing oxygen and food for the fish. Plant them in small pots of soil, except the floating plants.

Smiley's Shallow Water Plants are grown here at the Water Gardens under ideal natural conditions. You will be well pleased with their quality.

**ARROW HEADS**—Arrow shaped leaves with small white flowers. An excellent bog or shallow water plant that adds greatly to the appearance of your pool—**25c**.

**BULLRUSH**—A native swamp plant similar to the cattail—**25c** each, **3 for 50c**.

**CATTAILS**—A favorite swamp plant easy to grow and ornamental—**25c**.

**CREEPING PRIMROSE**—A rapid growing, partially submerged vine with willow shaped leaves producing an abundance of bright yellow flowers. Will grow in any moist place along the pool or may be submerged—**25c** each, **3 for 50c**.

**FLOATING HEART**—Bright yellow, fringed five petalled flowers, size of a half-dollar. The leaves are green blottedched with maroon. Should be planted in soil in two to eighteen inches of water—**25c**, **3 for 50c**.

**PARROT FEATHER**—Feathery, green shoots trailing over the water form soft airy masses about the base of taller plants. One of the best for planting in fountain basins—**15c** each; **4 for 50c**.

## OXYGENATING PLANTS

**ANARCHARIS**—A rapid grower desirable for pools and aquariums—**15c** each, **2 for 25c**.

**COON-TAIL**—Plume-like stems with finely dissected leaves. Fine for the aquarium—**15c**.

**CURLED LEAF FERN**—A fern-like plant growing submerged in the pool makes a beautiful background—**15c** each, **2 for 25c**.

**LUDWIGA**—A beautiful green and red tinted plant growing submerged—**20c** per bunch.

**MYRIOPHYLLUM**—Very good for goldfish spawning. The fish will also eat large portions. This evergreen-like plant is available throughout the year and is one of the most interesting of this group—**15c** each, **2 for 25c**.

**WATER POPPY**—The blossoms resemble the California Poppy. Each plant throws out many floating runners bearing large blossoms all summer long. Plant as you would a water lily—**15c** each, **2 for 25c**.

**VARIEGATED SWEET FLAG**—A fine hardy plant with saber-like leaves, broadly striped green and ivory. Grows about 2 feet high—**25c**.

**PICKEREL RUSH**—The blue flowers of this plant are borne freely throughout the entire season—**25c** each.

**WATER CANNA**—A hardy plant, with slim, graceful stalks, 4 to 5 feet high, and beautiful broad leaves. Forms an excellent background, with its spikes of purple flowers—**30c**.

## FLOATING PLANTS

**DUCK WEED**—Small three petalled floating plant giving the effect of a green carpet on the water. Fish like this one. Does equally well in sun or shade—**25c** per portion.

**FLOATING FERN (Azolla)**—Tiny, fern-like leaves forming emerald green or brown red clumps. A good plant for the fish—**25c** per portion.

**WATER HYACINTH**—The delicate spikes of lavender flowers with the peacock spot on the upper petals are most beautiful and interesting. The plants will float on the water but will produce more flowers when not allowed to drift about. A good plant for shady locations and should be crowded to produce lots of bloom. This plant is ideal for fish to deposit their eggs on—**15c** each.

## MARGINAL PLANTS

**FALSE DRAGON HEAD**—Spikes of pink hooded flowers 3 feet high—**25c** each, **\$2 per doz.**

**VARIEGATED RIBBON GRASS**—This attractive grass is splendid for use at the corners of your pool or along the walk way. The leaves are longitudinally striped with white and very ornamental—**25c** each.

## SACRED LOTUS (Hardy)

Thousands of years ago in the sacred gardens of Egypt was found an abundance of the Egyptian Lotus. This rare and strange plant was understood and appreciated by the Oriental people. The immense pink flowers like gigantic roses with a delightful fragrance set amongst the great shield-like leaves is a never-to-be-forgotten sight. They require the same care as water lilies growing in water from two to twelve inches deep. The plants spread rapidly and should be confined in boxes or tubs, taking care not to break the crown when planting.

**EGYPTIAN LOTUS**—The true flower of the Egyptians. Immense Pink flowers with sweet haunting fragrance; umbrella-like leaves. Tubers—**\$1.50**.

## Beauties in the IRIS FIELD

We have here at the Garden some of the finest Iris grown. The roots are healthy and well grown and always true-to-name. We would be most happy to supply you Iris for your garden. Let us send you a list and prices. We begin shipping bearded Iris right after the blooming season, which is around June 15, and continue until October 1.

### Moisture Loving Iris

**DOROTHY K. WILLIAMSON**—We think this is one of the prettiest of the water plants. Has graceful spikes of glowing royal purple flowers. Plant in shallow water or along the border—**25c**.

**YELLOW FLAG OR WATER IRIS**—One of the most graceful and necessary plants for the pool. Begins to bloom earlier than most any other Iris. Blooms the entire season. Thrives in water up to twelve inches and also in a moist border. Blossoms resemble the Siberian Iris in type. Produces an abundance of yellow blossoms. **25c** each.

**IRIS VERSICOLOR or BLUE WATER IRIS**—**25c** each, **\$2.00 per dozen**.

# HOW TO ORDER WELLS

AMERICAN LAWN & GARDEN

MAIL

## PLEASE READ CAREFULLY BEFORE ORDERING

**ORDER EARLY.** It is most important that your orders be in our hands early in the season, as in May and June we are very rushed. If you wish our prompt attention and want to get your plants in early, order in February and March.

**USE ORDER BLANK.** Please do not give your order on the same sheet with your letter. We can give you much quicker service if you use the order blank for the order, and letter paper for questions or comments. Give your name in full, together with street or rural route, and city and state.

**SUBSTITUTIONS.** If it should happen that we are out of one or more of the varieties you order, we will substitute, with your permission, another variety equally good or higher in value than the original order.

**Goldfish, aquariums, and supplies** can be shipped at any time of the year.

**IMPORTANT.** When you receive your shipment of roots, unpack at once and place them in water until ready to plant. Should you need to keep them for sometime before planting, it is best to submerge fully one-half the root in mud and cover with water.

**REMITTANCES.** Please make all checks and money orders payable to Smiley's Water Gardens, Seward, Nebraska. We prefer stamps to coins for small orders.

**WINTER CARE.** Hardy water lilies may be removed to the basement and kept moist and protected from mice throughout the winter. They need no other protection other than from direct freezing of the roots.

# GOLDFISH

## For Pools and Aquariums

To make your pool one of the most alluring spots in the garden, you should add gay colored fish. We have many varieties and types to pick from and while some prefer the common and giant goldfish for their pools the fancy types are equally desirable especially for the small pool. We exercise our best judgement in selecting pairs but as it is sometimes quite difficult to determine the sex we cannot guarantee this factor. A charge of 50c for shipping container will be made on small orders. In orders for 50 fish or more our large containers are used and they may be returned express prepaid, a cost of 20c.

**GIANT GOLDFISH**—Selected breeders, ten to twelve inches long. These are tried Breeders and if you wish to raise a lot of young goldfish, these are the best investment. **\$4.00** per pair.

**YOUNG GIANT GOLDFISH**—Not as fully developed as the older type; distinctive in colors for the pools and excellent for spawning—**\$2.00** per pair.

**YOUNG COMMON GOLDFISH**—According to size—10c, 25c, and 50c each.

## FANCY FISH

**IMPORTED JAPANESE FANTAILS**—Beautiful fish with broad double tails and bright coloring. Year old, Per Pair—\$1.25; two years old, Per Pair—\$2.00.

**SHUBUNKIN or CALICO FISH**—Beautifully mottled fish with a pattern of blue, gold and black. Year old, Per Pair—60c; two years old, Per Pair—\$1.15.

**CHINESE MOORS**—Jet black fish with telescope eyes. Year old, Per Pair—\$1.25; two years old, Per Pair—\$2.00.

**CALICO FANTAILS**—Highly colored fish, calico colors with double fan tails. Year old, Per Pair—\$1.25; two years old, Per Pair—\$2.00.

**CALICO TELESCOPES**—Handsome, vari-colored fish with double fan tails and telescope eyes. Year old, Per Pair—\$1.25; two years old, Per Pair—\$2.00.

## Scavengers for Pool and Aquariums

All aquariums and pools need scavengers, fish to feed upon the insects, snails to devour algae and green scum and tadpoles to eat decayed matter. Scavengers should be kept in all well balanced pools.

**JAPANESE SNAILS**—These large hardy snails frequently become as large as an English Walnut. They devour algae and green scum and help to keep the water clear. These snails do not lay eggs as do other varieties but are live bearers, bringing forth the young fully developed. 3 for 25c.

**BROWN RAMSHORN SNAILS**—Medium size snails with shell characteristics of that name. Very prolific egg layers and are very active scavengers. 15c per pair.

**RED RAMSHORN SNAILS**—Somewhat larger than the Brown Ramshorn, sometimes known as the Coral Snail. Excellent scavengers. Lend much color to the aquarium and pool. 2 for 25c.

**MOSQUITOES AND GOLDFISH**—It is recommended that goldfish be kept in all water lily pools. They are interesting and eat the mosquito larvae and aid in keeping the water clear. Twelve fish to a four by six pool is the best proportion.

### AQUARIUM for GOLDFISH DISPLAY

Size	Length, Width, Height (approximate)	Gallons	Shipping Weight (approx.)	Price Each
101	Aquarium 10x6x8	2	6 lbs. each	\$1.25

### Beautify Your Poor By Using

#### DENSO SUB-AQUA

#### POOL PAINT

By using this water proof concrete enamel you can get a beautiful sky blue or white background for your plants. It is a non-poisonous coating for concrete surface that is continually under water. It is not injurious to fish or plants and adds life and beauty to your pool. Prices F.O.B. factory, Independence, Ohio.

1 Qt., \$1.35; 1 Gal., \$4.75

#### ELASTIC CEMENT

ELASTIC CEMENT to mend your aquarium—1 lb. cans, 50c. Add 10c postage.

**NATURAL FISH-FOOD**—This is a properly balanced fish food for both the pool and the aquarium and is very inexpensive. Pint box, 50c; Quart box, \$1.00.

**CREEPING BENT GRASS**—Ideal for lawns. Makes a thick, rich, carpet-like growth within two months of planting time. No chance for weeds to grow in a lawn sown to Smiley's Creeping Bent Grass Stolons. (Not seed.) Enough to plant 100 square feet for \$2.00, f.o.b. Beaver Crossing, Nebr.

### GOLDFISH COLLECTION

This collection of fish and scavengers will supply the proper balance for the small or medium pool.

Shipping Can Included—Shipped Express Collect

2 Japanese Fantails    2 Calico Fish    \$6.00  
2 Black Telescopes    12 Jap Snails
